

All-Steel Poultry Buildings

Truss or Clear-span Design

One Great Poultry Building

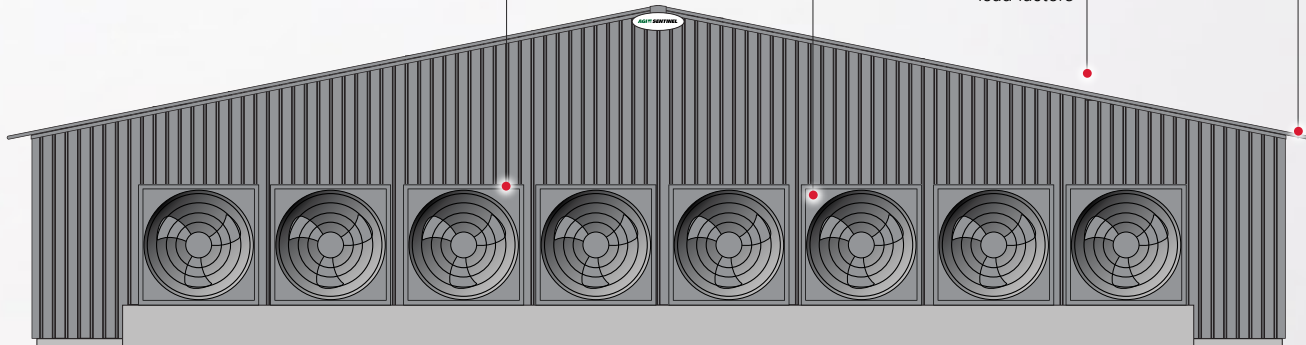

Reinforced steel framing on all fan and vent openings for years of trouble-free operation

Fan frames in sidewall and/or endwall are custom designed for fan size

Structurally engineered to meet all applicable area requirements for wind and other load factors

12-inch roof sheeting extension standard. Structural overhangs available upon request

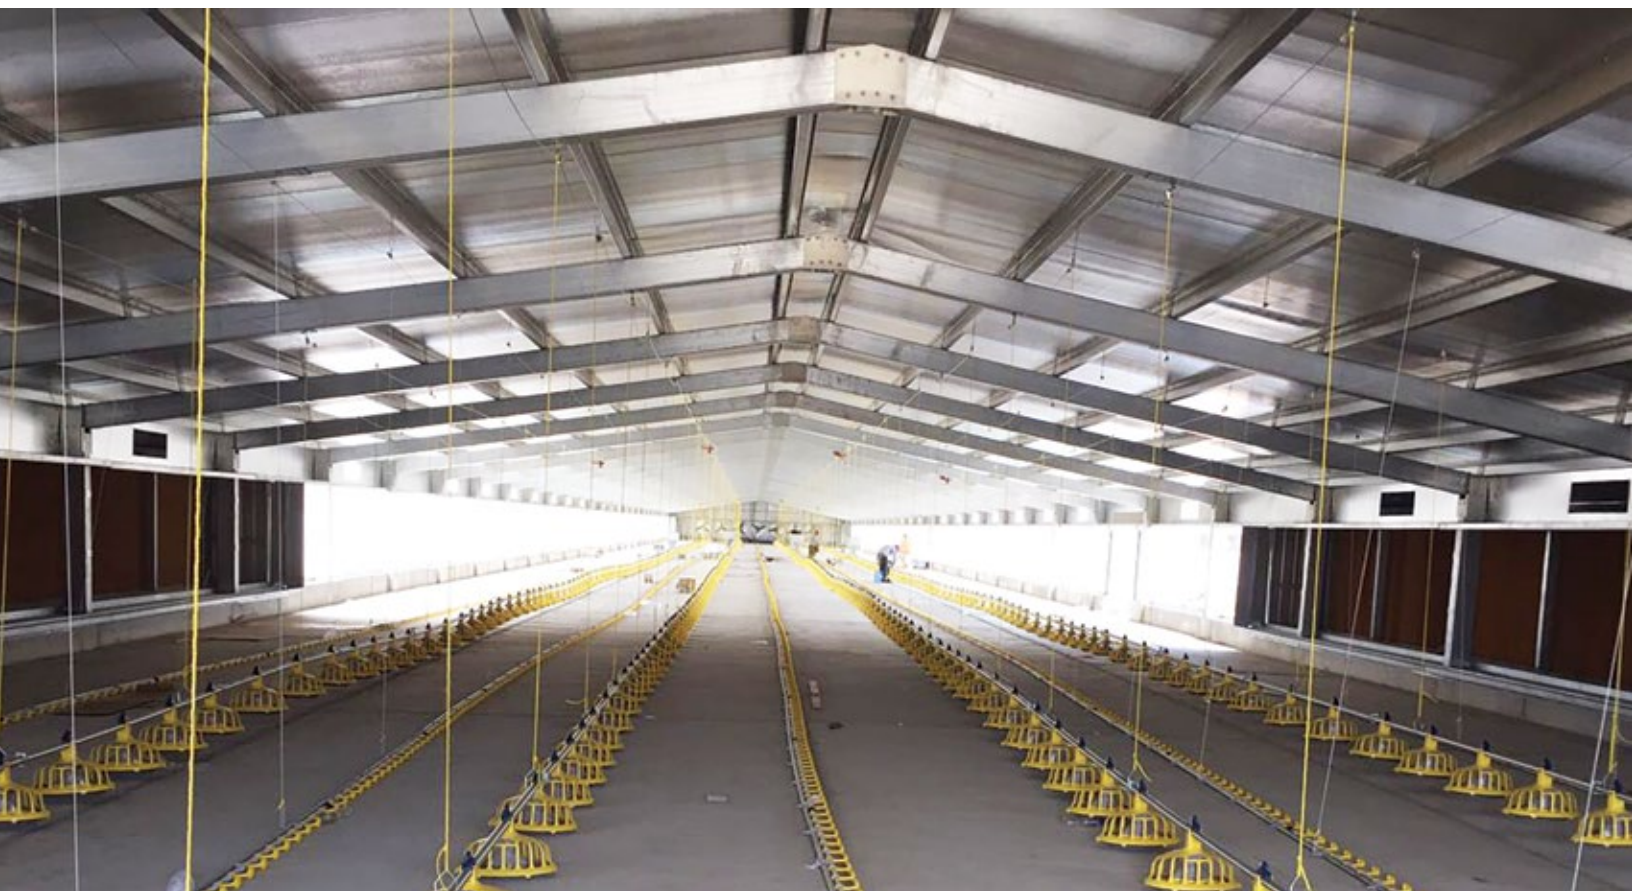

Quality. Versatility. Value.

The Pinnacle of Poultry Truss Building Design

- Available in flat bottom or vaulted truss configuration
- Optional fabric or steel suspended ceiling, with radiant barrier, fiberglass or cellulose insulation packages available
- Unique design means NO WELDING! Fast & easy to erect!
- Galvanized steel framing for maximum anti-corrosive protection
- "Z" purlin design minimizes dust and simplifies interior cleaning
- Fully coated fasteners with pre-punched connection. No field measuring or drilling required
- Structurally engineered to meet all applicable load factors

No Matter Which Style You Choose

The Clearly Superior Clear-Span Choice

- Superior Boxed 'C' channel design requires no welding, minimizes dust collection and is specifically engineered for quick and easy erection
- All galvanized steel framing offers maximum anticorrosive protection in the harshest environments
- Comes with all coated fasteners required for building assembly
- Wall girts 'C' channel design minimizes dust and are used in all framed openings for maximum stability

Optional Accessories

Sentinel has the skills, knowledge and experience to design your all-steel poultry buildings to quickly recoup your initial investment and reduce maintenance costs over the life of the building. Select from these and other options available to customize your buildings to fit your individual needs.

Doors

A wide variety of door types and styles to choose from, including interior and exterior doors, control room doors and evaporative cooling chamber access doors.

Insulation Packages

A wide array of insulation to fit your climate/operation. Suspended fabric or steel ceilings with radiant barrier, fiberglass or cellulose insulation packages to provide the R-value protection needed.

The All-Steel Solution

All-steel poultry buildings are vastly easier to clean, maintain and disinfect than woodbased structures. Independent studies have shown that all-steel poultry buildings enable chicks to gain weight faster and can increase the number of annual turns.

Framed Fan Openings

Solid reinforced framed fan openings in the building endwalls, sidewalls, or both! Custom engineered to the specific size fan required.

Sidewalls

Varying sidewall height based on your needs, and engineered for side curtains or solid sidewall panels.

SENTINEL is an AGI Brand.

AGI is a leading provider of equipment solutions for agriculture bulk commodities including seed, fertilizer, grain, and feed systems with a growing platform in providing equipment and solutions for food processing facilities. AGI has manufacturing facilities in Canada, the United States, the United Kingdom, Brazil, South Africa and Italy and distributes its products globally.
