

# Flexmill

## The Future of on Farm Feed Processing

A modular and flexible design that allows you to configure your feed mill for maximum performance and value. Designed to replace your current skid system with minimal interruption and without changes to your existing building. Higher capacity on the same floor plan.

### Features

- Teardrop Hammer Mill available from 30 to 75 HP
- Hammer Mill Air Assist substantially increases capacity and feed quality
- Horizontal Mixer dramatically reduces mixing time with excellent CV
- Up to four scales decreases batching time
- Loop conveyor provides a low profile to fit in existing buildings
- Integrated Micro system
- Available with Tote Bin stations

### Advantages

- More than double your current production rate without changes to your bins or building
- Commercial duty equipment made to last with lower operating costs
- Bolt together components you install yourself, quickly
- Dust tight components improve mill sanitation
- Can be automated by many industrial vendor packages
- Installation and start up support by experts

**VIS is an AGI Brand.**

AGI is a leading provider of equipment solutions for agriculture bulk commodities including seed, fertilizer, grain, and feed systems with a growing platform in providing equipment and solutions for food processing facilities. AGI has manufacturing facilities in Canada, the United States, the United Kingdom, Brazil, South Africa and Italy and distributes its products globally.
